Daniel Okafor

Senior Data Engineer

daniel.okafor@example.org · +44 7700 900123 · Manchester, UK · github.com/dokafor-example

Data engineer with nine years of experience building batch and streaming pipelines. Focused on data quality and cost control.

Experience

Senior Data Engineer, Northwind Logistics, Manchester
Apr 2021 – Present

- Cut nightly warehouse load time from 6 hours to 75 minutes by moving to incremental Spark jobs.
- Reduced cloud data spend by 38% (about £210k a year) through partition pruning and storage tiering.
- Worked closely with stakeholders to improve data culture.

Data Engineer, Brightwater Insurance, Leeds
Jan 2018

- Built a Kafka ingestion layer handling 40,000 events per second at peak.
- Helped with various migration projects.
- Wrote 120+ dbt models and raised test coverage of core tables to 90%.

BI Developer, Halden Retail Group, Sheffield
Sep 2015 – Dec 2017

- Delivered 25 Tableau dashboards used by 300 store managers.
- Responsible for reporting.
